IF THERE WAS ANY DOUBT

As copied from one of the leading New York papers: "If there was any doubt in the minds of manufacturers of tailored suits, such doubts should certainly have been dispelled after viewing the Easter parade. They were without question the approved costume for street wear for all classes of women. At Atlantic City it is safe to say that 90 per cent of the women seen on the street wore two-piece tailored suits." The notable feature of the tailored suit this season is their simplicity. The coats that seem to receive the most favor are those having the long revers and fastening with two to three buttons. This long opening in front gives the wearer an opportunity of showing the frilled waist front or jabo, which are so popular.

Why We Sell Blue Label Canned Goods

Canned goods look pretty much all alike on the outside. The tins on the shelves look all about the same to the customer outside the counter. But INSIDE the tins! THAT's the part you EAT. Did you ever stop to think what a difference there might be in the selecting, preparing, cleaning and preserving or cooling of the fruits and vegetables that go INSIDE these cans? No doubt you have. We have, too. And we don't buy canned goods according to the way the tins look; pretty pictures on the cans don't influence us for a minute. Neither do the bigger profits made by handling inferior goods. We buy only the purest known canned goods from those high-grade canners with proven reputations for care and cleanliness.
